

Recommended Digital Device Specification for Students (Bring Your Own Device - BYOD)

Stratford College is in a position to recommend the following specification when buying a student digital device needed for Teaching and Learning in the classroom. If your child already has a relatively new digital device then that should be appropriate. If in doubt it is advisable to check with the school office.

Students attending Stratford College are given a **Microsoft Office 365 account** with access to online Microsoft Office 365 applications.

The digital device should have the following functionality and peripherals:

- Windows 11
- Solid State Drive (SSD) with at least 128 GB of storage
- Memory: at least 4GB RAM
- Processor: at least Intel® Core™ i3, 10th Generation
- WiFi
- Touchscreen (optional)
- Camera
- Microphone
- USB port(s)
- Keyboard
- Lightweight
- Stylus (optional)
- Protective Case

Note: The term 'digital device' does not mean a smartphone or a device with 4G or 5G functionality. Students when using their digital device in Stratford College

[Last updated: 16 June 2026]

must use the school WiFi connection and firewall as detailed in our [Acceptable Computer User Policy](#). Students leave their smartphone or device with 4G/5G functionality in their locker. Please ensure that the digital device and associated peripherals are labelled. Students are responsible for their own digital device when in school. Devices can be bought through a retail outlet of your choice.
